Problem perceived regarding the following in your community
Table 2.2.1: Contribution of drug and alcohol use to crashes or injuries ..... 33
Table 2.2.2: Contribution of drug and alcohol use to crimes ..... 34
Section 3: Permissiveness of Attitudes Toward AOD Use
Table 3.1 Agreement or Disagreement with the following statements ..... 35-37

- Okay for youth to drink at parties if don’t get drunk
- Youth can drink if don't drive afterwards
- Okay for youth to smoke cigarettes
- Youth experiment with AOD and grow out of it
- Okay for parents to provide alcohol in their home to own children
- Okay to offer alcohol to youth other than their own children
- Teenage drinking is acceptable in my community
- Driving under the influence of AOD is okay
- Riding in a motor vehicle with someone under the influence of AOD is okay

## Section 4: Community Support for AOD Prevention

Table 4.1 Agreement or Disagreement with the following statements

- Law enforcement spend more time enforcing minimum drinking age
- Schools need to be more active in dealing with AOD problems
- Possible to reduce AOD problems through prevention
- AOD prevention problems are a good investment
- Community is responsible for establishing AOD prevention problems
- PSAs as a medium for changing attitudes of AOD use
- Increase taxes on alcohol
- Increase taxes on tobacco
- Drinking and driving laws are enforced in my community
- Law prohibiting giving alcohol to your own children

## Table 4.2

Do you support the following? 41, 42

- Minimum legal drinking age of 21
- Penalties for adults who provide alcohol to youth
- Compliance checks
- Law prohibiting giving alcohol to your own children
- DUI checkpoints

Do you support BANS on the following? ......................................................................................... 43

- Liquor advertisements on TV
- Beer and wine advertisements on TV
- Billboard alcohol advertisements

Would you ATTEND the following events if they were alcohol-free? 44

- Party
- Wedding Dance/Reception
- Sporting Event

## Section 5: Access to Alcohol and Other Drugs

Table 5.1 Questions regarding ACCESS in your community

- Youth purchase of alcohol at stores themselves
- Youth to get older person to purchase of alcohol for them
- Youth to order a drink at a bar
- Youth to sneak alcohol from their home or friend's home
- Youth to get parents to give them alcohol
- Youth to get other family members to give them alcohol

Table 5.2 Questions regarding ACCESS in your community. 48, 49

- Marijuana
- Inhalants
- Cocaine
- Methamphetamine
- Hallucinogens

## Section 6: Perception of Community Commitment

Table 6.1 Agreement or Disagreement with the following statements 51-53

- Preventing AOD use is important among youth
- Concern for sufficiency of community's AOD prevention programs
- Achieve AOD free youth by educating youth themselves
- Achieve AOD free youth by educating parents
- Achieve AOD free youth by educating the community
- Community leaders interested in reducing access and abuse of AOD
- Knowledge of access to AOD services for help with abuse

Table 6.2 Community has an action plan for dealing with substance abuse issues............................ 54
Table 6.3 Primary source for news about crime ............................................................................... 55

## Executive Summary

The following is a summary of the key findings relative to Region VI respondents.
Adult Use of Alcohol [see Table 2.1.1]

- Similar to the statewide results, when participants were asked to rank the seriousness of adult use of alcohol, 68.2 percent of the Community Members perceived this to be a minor to moderate problem in their community, while 19 percent felt it was serious. Likewise, 68.8 percent of Key Informants considered adult alcohol use as a minor to moderate problem, whereas 31.3 percent believed this to be a serious problem.

## Youth Use of Alcohol [see Table 2.1.1]

- When asked about youth alcohol use, 35.8 percent of Community Members felt that youth alcohol use was a serious problem and 49.6 percent felt this was a minor to moderate problem in their community. With Key Informants, the majority (58.3\%) felt that youth alcohol use was a serious problem and 41.7 percent believed this was a minor to moderate problem in their community.

Adult Use of Methamphetamine [see Table 2.1.6]

- Although 36.9\% of Community Members perceived adult use of methamphetamine as a minor to moderate problem, one-third (32.5\%) indicated that they don't know the extent of the problem. Of Key Informants, 47.9 percent of respondents indicated adult use of methamphetamine to be a minor to moderate problem, and 37.5 percent felt this was a serious problem.

Youth Use of Methamphetamine [see Table 2.1.6]

- Of Community Members, 37.6 percent felt youth use of methamphetamine was a minor to moderate problem and 33.9 percent specified they don't know. Among Key Informants, 45.8 percent perceived methamphetamine use by youth as a minor to moderate problem and 20.8 percent don't know the extent of the problem.

## Contribution of Drug and Alcohol Use to Crashes or Injuries [see Table 2.2.1]

- Of the Community Members, 56.6 percent believed that the contribution of drug/alcohol use to crashes/injuries was a minor to moderate problem and 21.2 percent said it was a serious problem. Among Key Informants, 54.2 percent specified this was a minor to moderate problem and 43.8 percent felt this was a serious problem within their community.

## Community Acceptance of Underage Drinking [see Table 3.1]

- The Community Members generally disagree-strongly disagree (70.8\%) that there was community acceptance of underage drinking. Perceptions of the Key Informants were slightly different, in that 60.4 percent disagree-strongly disagree that underage drinking is accepted in the community and 39.6 percent agree-strongly agree with this statement.

## Support for Increasing Taxes on Alcohol [see Table 4.1]

- Of Community Members, 61.3 percent of agree-strongly agree in support of increasing alcohol taxes, while 36.5 percent of the disagree-strongly disagree. Similarly, Key Informants supported increasing alcohol taxes, in that 62.5 percent agree-strongly agree while 37.5 percent disagreestrongly disagree.

## Laws Prohibiting Giving Alcohol to Your Own Children [see Table 4.2]

- Of Community Members, 65.7 percent indicated that yes they would be in support of this type of law. Key Informants were more supportive of this as 75 percent responded that yes in support of a law prohibiting giving alcohol to "your own" children.

## Support for Advertising Liquor/Beer/Wine Ads on Television/Billboards [see Table 4.3]

- The results were very similar regarding all three questions related to alcohol advertising. Over sixty-four percent of the Community Member respondents were in support of banning alcohol advertisements on either television or billboards. Among Key Informants, 54.2 to 60.4 percent indicated that yes they would support banning this form of advertising.

## Youth Accessibility to Alcohol [see Table 5.1]

- When Community Members were asked "How difficult is it for youth to get an older person to buy alcohol for them," 47.4 percent believed that it is slightly/somewhat difficult, while 39.1 percent indicated it was not at all difficult. Among Key Informants, 50 percent responded that this was slightly/somewhat difficult and 47.9 percent of respondents indicated that it was not at all difficult.
- When Community Members were asked the following, "How difficult is it for youth to sneak alcohol from their home or a friend's home," 43.4 percent believed this was not at all difficult and 44.2 percent indicated this was slightly/somewhat difficult. Of the Key Informant population, 75 percent specified that it was not at all difficult for youth to obtain alcohol in this manner.

Adult/Youth Access to Marijuana/Methamphetamine [see Table 5.2]

- Of Community Members, 42.7 percent perceived adults/youth access to marijuana as slightly/somewhat difficult while 34.3 percent responded it was not at all difficult to obtain. Similarly, Key Informants, 54.2 percent responded this was only slightly/somewhat difficult for adults/youth to obtain while 39.6 percent perceived access to marijuana as not at all difficult.
- Of Community Members, 23.5 percent perceived access to methamphetamine as not at all difficult to access and 45.6 percent believed that access was slightly/somewhat difficult. Fifty-six percent of Key Informants indicated that access to methamphetamine was slightly/somewhat difficult while 29.2 percent believed that accessing methamphetamine was not at all difficult.

## Presence of Community Action Plan [see Table 6.2]

- Among Community Members, the majority (59.1\%) did not know if their community had an action plan in place for dealing with issues surrounding substance abuse. Of Key Informants, 33.3 percent indicated that yes there was a plan in place while 35.4 percent did not know.

## Sources of Information Regarding Crime [see Table 6.3]

- Community Members indicated that the most common media sources accessed for information regarding crime were "Television" (39.1\%), and "Newspapers" (25.5\%). Similarly, the most common media sources for Key Informants were "Television" (47.9\%) and "Newspapers" (29.2\%).

## Introduction

The Rural Crime and Justice Center (RCJC) at Minot State University, in conjunction with North Dakota's Department of Human Services, implemented a Community Readiness Survey to gauge perceptions of alcohol and other drug use in North Dakota communities. This was made possible through funding provided by North Dakota's Department of Human Services, Division of Mental Health and Substance Abuse Services. The Community Readiness Survey assessed the perceptions of Youth Alcohol and Other Drug Use by surveying community members living in North Dakota. The sample represents eight regions in North Dakota and within each region frontier, rural, and urban communities are represented based on population density. This report will focus on the data collected from Region VI and will also include the statewide results. This is not a statistical comparison; region wide data is simply presented alongside statewide data.

The RCJC conducted a similar study in 2005, surveying community members residing in Region II of North Dakota. The Region II Alcohol, Tobacco and Other Drug Use study provided a concrete foundation for looking at parallel issues at the statewide level.

The use and abuse of alcohol and other drugs has a considerable impact on communities throughout the nation. Often times the use of such substances is overlooked by members within a particular community. Consequently, community perception and the readiness to address the problem of alcohol and other drug use needs to be periodically assessed in order to fully develop a comprehensive plan.

## Project Goals

The specific goal of the Community Readiness Survey was to design an assessment tool targeting communities and the public's readiness to respond to alcohol and other drug use (AOD) among adults and youth. Since North Dakota communities are currently experiencing high rates of binge drinking among adolescents, the RCJC, along with the North Dakota Department of Human Services, Division of Mental Health and Substance Abuse Services, recognized the importance of assessing community members' perceptions regarding these issues. The five pertinent areas that were addressed in the survey were: 1) Community perception of an AOD problem; 2) Permissiveness of attitudes towards AOD use; 3) Community support for AOD prevention; 4) Community perception of adolescent access to alcohol and other illegal substances; and 5) Overall perception of community commitment.

By addressing communities at local levels, we can begin to identify the real issues that are plaguing our communities. It is our hope that this project will lead to promising initiatives concentrating on our youth and lead to preventative measures that can decrease the rate of AOD concerns in North Dakota.

## Literature Review

The destructive use and abuse of alcohol, tobacco, and other drugs has become a major social problem deeply rooted in our society (www.bridges-mccasa.org/ypp.html). The impressionability of youth makes them extremely vulnerable to many problems associated with alcohol and drug abuse.
Furthermore, adolescence is an experimental stage in life and often results in the testing of illegal substances. Since North Dakota is leading the nation in adolescent binge drinking (NSDUH, 2004-05), preventative efforts need to be taken at various levels in an attempt to curtail these problems.

## National Survey on Drug Use and Health

Data obtained from the State Estimates of Substance Use from the 2004-2005 National Surveys on Drug Use and Health (NSDUH) illustrate the extent of substance abuse issues within communities nationwide. The Substance Abuse and Mental Health Services Administration (SAMHSA) combined two years of data to enhance the accuracy of estimates for less populated states. The survey evaluates state rates of use of illegal drugs, binge drinking, serious mental illness, and tobacco use. State-by-state data provides a powerful tool for policymakers at the federal, state, and local levels by identifying needs and targeting prevention and treatment resources.

## Alcohol

In regards to rates of past month alcohol use, North Dakota was ranked in the top five of all states for all three age groups (12 to 17, 18 to 25 , and 26 or older) (NSDUH, 2004-05).

Results from the National Survey indicate that at the national level, almost a quarter of all persons aged 12 or older participated in binge use of alcohol in the past month. Binge alcohol use is defined as "drinking five or more drinks on the same occasion (i.e., at the same time or within a couple hours of each other) on at least one day in the 30 days prior to the survey" (NSDUH, 2004-05). The highest rates of binge alcohol use occurred among persons aged 18 to 25 . North Dakota had the highest rate in this age group at 58.1 percent, almost double the highest rate among persons aged 26 or older and almost four times the highest rate among youth aged 12 to 17 (NSDUH, 2004-05). Based on this finding alone, an assessment of communities in North Dakota is necessary in order to develop policy to concentrate on these issues.

In assessing perceptions of the risk of binge alcohol drinking use to the actual rates of usage, the National Study concluded that although North Dakota had the highest rate of binge drinking among all 50 states, the perceived risk of binge drinking was among the lowest. Similarly, six other states with higher rates of binge drinking also scored lower in terms of perception of risk.

## Illicit Drugs

According to the results of NSDUH (2004-2005), the frequent use of illicit drugs in North Dakota appears to be less severe than alcohol use. The survey results indicate that North Dakota was one of two states to show a significant decrease from 2003-04 to 2004-05, in the percentage of "all persons aged 12 or older who used an illicit drug in the past month" (North Dakota decreased from 7.5\% to 6.2\%).

North Dakota was also one of six states to represent a decline amid the 2003-04 and 2004-05 studies, in "past year use of marijuana among all persons aged 12 or older," dropping from 10.1 percent to 8.5 percent. In regards to other illicit drugs, aside from marijuana, state-by-state results also show improvements in North Dakota's prevalence of use. According to NSDUH, "illicit drugs other than marijuana include cocaine, heroin, hallucinogens, inhalants, and the nonmedical use of prescription-type pain relievers, tranquilizers, stimulants, and sedatives" (NSDUH, 2004-05). Both North and South Dakota had the lowest rate ( $2.8 \%$ ) of past month use of an illicit drug other than marijuana among persons 12 or older, compared to the national average of 3.6 percent and the state with the highest rate of use, Colorado at 4.5 percent. Lastly, with regards to past year cocaine use among all persons aged 12 or older, North Dakota had the lowest rate (1.7\%) in that population (NSDUH, 2004-05).

The focus of the next section is to identify the significance of public opinion, the influence of the media on the configuration of public opinion, and details how this information can be interpreted and useful when looking at developing effective prevention strategies for Alcohol and Other Drug use among youth. Results from the 2007 Youth Risk Behavior Survey will be incorporated.

## Media Influence on Public Opinion

Mass media has a tendency to shape a person's outlook, their cultural identity, as well as processes of open exchange (www.wz.nrw.de, 2006). The nature of the media has changed drastically and has evolved with technology. Therefore, the source of information for people, whether it is television, newspaper, internet, or other forms of mass media, may play a crucial role in shaping ideas and perceptions. This can lead to the development of inaccurate understanding of the issues at hand, especially if the source of information does not clearly state the distinction between fact and opinion.

## North Dakota Youth Risk Behavior Survey (YRBS)

Through the implementation of the YRBS, youth are provided the opportunity to share their experiences with AOD in this survey that is conducted every two years. High School students are asked a series of questions in which they are instructed to answer "truthfully." The YRBS is designed to target those behaviors related to the paramount causes of death and disability among youth and young adults and to evaluate how these risky behaviors change over time (North Dakota High School, YRBS data, 2007). The YRBS is a self-reporting survey that is intended to measure health-risk behaviors that fall into six categories:

- Behaviors that result in unintentional injuries and violence
- Tobacco use
- Alcohol and other drug use
- Sexual behaviors that result in HIV infection, other sexually transmitted diseases, and unintended pregnancies
- Dietary behaviors
- Physical activity (ND YRBS data, 2007)

The data obtained from the YRBS represent both urban and rural areas allowing the data to focus on problem areas geographically. Thus, data may potentially be helpful in identifying which regions are in most need of resources and assistance to target problems plaguing their youth. According to North Dakota's YRBS data (2007), 6,745 middle school students (Grades 7-8) from 110 North Dakota middle schools participated in the survey and 9,750 high school students (Grades 9-12) from 104 North Dakota high schools participated in the survey.

## North Dakota YRBS (2007) Middle School Results

Results pertaining to the use of alcohol and/or other drugs will be discussed. The following section will include Statewide results from the YRBS, as well as data as it pertains to Region VI (Jamestown Area).

## Alcohol Use

In regards to the "percentage of students who have ever had a drink of alcohol, other than a few sips," the Centers for Disease Control and Prevention (CDC) Statewide results indicate that 32.7 percent of students have had at least one drink of alcohol in their lifetime; Region VI results indicate that 33.8 percent of students indicated ever having had a drink of alcohol (North Dakota YRBS, 2007).

The percentage of students who indicated having had five or more drinks of alcohol in a row, that is, within a couple of hours (binge alcohol use) was 15 percent for the Statewide results, percentage of use in Region VI was lower at 12.7 percent.

## Marijuana \& Other Drug Use

The percentage of students who specified ever having used marijuana was 7.8 percent Statewide.
Region VI results showed that 3.1 percent of students indicated having used marijuana at least once in their lifetime. The Statewide percent of students who had sniffed glue, breathed the contents of spray cans, or inhaled any paints or sprays to get high for the first time before age 11 years was 9.5 percent; results for Region VI indicated 8.9 percent. Students who responded as ever having used methamphetamines - also called speed, crystal, crank or ice, was 1.7 percent Statewide; Region VI results indicate that 1.2 percent of students have used methamphetamine at least once in their lifetime.

## North Dakota YRBS (2007) High School Results

## Alcohol Use

According to the Statewide results, the percentage of students who "had at least one drink of alcohol on one or more days during their life" was 73.9 percent. Region VI (Jamestown Area) results specified that 76.3 percent of students had reported engaging in alcohol use at least once in their lifetime.

Statewide, 32.5 percent of students specified having had "five or more drinks of alcohol in row, that is, within a couple of hours, on one or more of the past 30 days" (binge alcohol use). Likewise, Region VI results illustrated that $32.8 \%$ of students had engaged in this type of behavior within the past 30 days.

When students were asked to report whether they "drank a usual type of alcohol during the past 30 days", 43.9 percent of students Statewide reported that they preferred a specific type of alcohol to
consume; percentages for Region VI indicated that 45.6 percent preferred to consume a specific type of alcohol.

## Marijuana \& Other Drug Use

According to the Statewide results, 30.1 percent of students indicated having used "marijuana one or more times during their life"; Region VI results indicated that 18.7 percent of students had engaged in this type of behavior.

With a focus on other drugs, students were asked a series of questions regarding prevalence of use. Statewide, 6.2 percent of students reported having used "any form of cocaine, including powder, crack, or freebase one or more times during their life" (North Dakota YRBS, 2007). Region VI produced lower numbers in that 3 percent of students reported having used a form of cocaine on one or more occasions in their lifetime.

When students were asked if they have "sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high one or more times during their life," Statewide results illustrated that 11.1 percent of students had engaged in this behavior; percentages for Region VI were slightly lower, at 10.6 percent.

When asked whether they had used "methamphetamines one or more times during their life," the Statewide results indicated that 4.1 percent of students had used methamphetamines at least once, and Region VI rate of use was lower at 2.9 percent.

Statewide outcomes indicated that the percentage of students who were "offered, sold, or given an illegal drug by someone on school property during the past 12 months" was 18.7 percent. Region VI percentages were slightly lower at 17.7 percent.

The next section will discuss in detail the research methods that were used to efficiently complete the research process. The topics that will be discussed include survey construction/measurement, sample populations, overall sample sizes, participant selection for the Key Informant groups and the Community Members, the procedure for survey distribution, and response rates for both participants and nonparticipants.

## Methods

The RCJC, in collaboration with the North Dakota Department of Human Services, Division of Mental Health and Substance Abuse Services completed this research project in an attempt to assess community perceptions regarding issues of alcohol and substance abuse. The data obtained reflect small towns and communities and resident's willingness to recognize AOD use within their communities. Recipients of the survey were provided the opportunity to communicate their beliefs and opinions regarding AOD abuse. It is anticipated that the data collected from this study will create opportunities for frontier, rural, and urban communities within North Dakota to respond effectively to these issues.

## Survey Development

This project involved one data collection instrument designed to assess the community's perception of AOD use within their community. A portion of the questions contained in this survey are used with permission from the Community Readiness Survey © 1999 by the Minnesota Institute of Public Health (www.miph.org). Five specific areas were addressed in the survey: Community Perception of an Alcohol and Other Drug (AOD) Problem; Permissiveness of Attitudes Toward AOD use; Community Support for AOD Prevention; Access to Alcohol and Other Drugs; and Perception of Community Commitment. The input received from selected community members will facilitate more effective responses in dealing with substance abuse.

The survey included ten demographic questions, sixty-one ranking questions, followed by three open-ended questions.

## Survey Construction/Measurement

Ideally, this survey was created to evaluate the opinions of community members related to AOD use within frontier, rural, and urban communities throughout North Dakota. Of the five specific classifications included, each was intended to evaluate different areas of AOD issues. This survey was compiled based on a ranking system and all questions, with the exception of the demographic questions, were ranked using two, four, or five point Likert scales.

## Section 1 - Demographics

This section of the survey focused on demographic questions, including age, sex, race/ethnicity, employment status and current occupation, level of church and community volunteering, location (i.e., city and county), and number of children present in the home.

## Section 2 - Community Perception of an AOD Problem

Items in this category focused on perception of alcohol and other drug use issues within each community. Participants were questioned as to how much of a problem they perceived for both adults and youth regarding the following: use of alcohol; use of tobacco; and use of marijuana to be in their community. Other items consisted of use of inhalants, cocaine, methamphetamine, over-the-counter drugs,
prescription drugs, and hallucinogens. Final items in this section included contribution of drug and alcohol use to crashes or injuries and contribution of drug and alcohol use to crime.

## Section 3 - Permissiveness of Attitudes toward AOD use

This section focused on how tolerant community members may or may not be in relation to AOD issues. Items required participants to indicate the extent to which they agree or disagree with the following statements: youth consuming alcohol at parties; youth drinking and driving; youth smoking cigarettes; youth alcohol and other drug experimentation; parents offering alcoholic beverages to youth in their own homes; community acceptance of underage drinking; driving while under the influence of alcohol and/or drugs; and riding in a motor vehicle with someone under the influence of alcohol and/or drugs.

## Section 4- Community Support for AOD Prevention

Willingness to support AOD prevention initiatives was the focus of this section of the survey. Participants were asked to rank the items ranging from strongly disagree to strongly agree. Items included the following: a focus on law enforcement competency; support for educational and prevention programs; community commitment; advertising devices; tax issues related to alcohol and tobacco; the enforcement of drinking and driving laws; and laws prohibiting parents providing alcohol to their own children.

Additional items in this section assessed responses regarding support for the following statements: drinking age of 21 years; penalties for adults who provide alcohol to youth; compliance checks; laws prohibiting giving alcohol to your own children; and DUI checkpoints. Respondents were also questioned as to whether or not they support bans on the following: liquors advertisements on TV; beer and wine advertisements on TV; and billboard alcohol advertisements. The final series of questions asked respondents if they would be willing to attend the following events if they were alcohol-free: a party; wedding dance/reception; and sporting events.

## Section 5 - Access to Alcohol and Other Drugs

This series of questions focused on the availability of alcohol and other drugs within the sampled communities. Respondents were asked to indicate the level of difficulty in which youth can obtain alcohol under the following circumstances: liquor store accessibility; bar accessibility; at home accessibility; and alcohol provided by parents and/or other family members. Regarding the accessibility of illegal substances within the community, respondents were asked to rank how difficult it is to access marijuana, inhalants, cocaine, methamphetamine, and hallucinogens.

## Section 6 - Perception of Community Commitment

Lastly, participants were asked to rank the community's overall commitment to addressing the perceived problems of alcohol and substance use. The questions focused on the importance of preventing alcohol and drug use, concern for the availability of sufficient prevention programs, the most effective method for achieving drug free youth, through educating youth, parents, or community members, the presence of leaders within the community willing to address these issues, where to seek assistance within
the community regarding these matters, the presence of a community action plan, and primary sources for information regarding crime.

## Sample Population

Participants were selected using a random sample from telephone directories representing community members throughout North Dakota, as well as databases of professionals obtained from respective agencies chosen for the study. Random numbers were selected from a random numbers table, as guided by statistical sampling procedures. The random numbers identified were 34 and 81. For the shorter directories, every $34^{\text {th }}$ name was selected and for the larger directories, every $81^{\text {st }}$ name. The numbers chosen were adequate in ensuring that each directory was, at minimum, sampled through one time.

## Overall Sample Sizes

The overall sample consisted of 16,125 individuals selected statewide. The sample of 16,125 was divided into two groups: Community Members and Key Informants. The same survey instrument was used for both groups.

## Community Members Participant Selection ( $\mathrm{N}=14400$ )

For the Community Members sample of 14,400 , participants were selected through a systematic random sampling of households. The households to be sampled were selected from North Dakota telephone directories. The two main sources utilized to obtain this information included: 1) North Dakota Telephone Association (i.e., maintain listings on Local Exchange Companies) and 2) DEX electronic directories. Local exchange companies provided the following directories for sampling: Polar Communications; Souris River Telephone (SRT) Communications; Consolidated Badlands; Southeast North Dakota; Durum Triangle; and Northwest North Dakota. DEX Directories provided residential information on the following cities and surrounding areas: Bismarck/Mandan; Dickinson; Fargo/Moorhead; Grafton; Grand Forks/East Grand Forks; North Dakota/South Central; Jamestown/Valley City; Wahpeton/Breckenridge; and Williston. The listings included the following information: non-residential listings; duplicate phone numbers (i.e., households with more than one landline were counted as one household); and listings from towns/cities (i.e., East Grand Forks, Moorhead, Breckenridge) bestriding neighboring states (i.e., Minnesota, South Dakota).

Since the community member participants were selected from the telephone directories, the selection included the risk of eliminating potential candidates for the study due to unlisted telephone numbers and relocation. However, this was the most exhaustive and accurate listing that could be obtained for the purposes of this study.

## Sample Size for Community Members

Sample sizes were predetermined by the Department of Human Services, Division of Mental Health and Substance Abuse Services (See Appendix A). Within each region, 1,800 community members (i.e., 600
each from urban, rural, frontier) were sampled tallying 14,400 across all eight regions in North Dakota. Definitions of population density, although differing by source, were obtained from the U.S. Census Bureau system. Urban Areas (UA) are defined as those counties with a central city and the surrounding area consisting of a population of 50,000 or more. An Urban Cluster (UC) consists of densely settled territory that has at least 2,500 people but fewer than 50,000. Subsequently, by this definition Rural Areas consist of all territory located outside of urbanized areas and urban clusters. A Frontier County describes a county with a population density of six or fewer persons per square mile (U.S. Census Bureau, Census 2000). For North Dakota, persons per square mile according to the U.S. Census, 2000, averaged 9.3.
Key Informant Group Participant Selection (N=1725)
The Key Informant sample was selected from the following professions: School Counselors; Family Medicine/Physicians; Social Services; Treatment Providers; Prevention Coordinators; and Law
Enforcement agencies to include Police and Sheriff. The names and addresses of individuals were obtained by purchasing Excel databases of the respective agencies/entities. A listing of current employees within each professional group was obtained as detailed below:

1. School Counselors in North Dakota-purchased through North Dakota Department of Public Instruction (NDDPI);
2. Family Medicine Physicians-free of charge through the North Dakota Academy of Family Physicians;
3. Social Services-purchased from North Dakota Board of Social Work Examiners (NDBSWE);
4. Treatment Providers- purchased from North Dakota Board of Addiction Counseling Examiners (NDBACE)
5. Law Enforcement Agencies-Police and Sheriff Departments were identified through a public listing of agencies from the North Dakota Peace Officer Standards and Training Boards (NDPOST)
6. Prevention Coordinators-provided by the state Prevention Administrator

Each North Dakota law enforcement agency (113) was included in the sample (i.e., one survey mailed to each agency/department), as well as one survey mailed to all 12 Prevention Coordinators statewide (totaling 125 surveys distributed among these two groups). For the remaining Key Informant Groups, Proportional Allocation was used to determine what percentage of each database must be selected to attain a sample of 1,600 . The table below demonstrates the proposed sample sizes as guided by this formula:

| KEY INFORMANT GROUP |  | Group Database N | Sample N |
| ---: | ---: | :---: | :---: |
| School Counselor | 347 | 209 |  |
| Family Medicine Physicians | 385 | 232 |  |
| Social Services | 1648 | 990 |  |
| Treatment Providers | 281 | 169 |  |
| Law Enforcement agencies | 113 | 113 |  |
| Prevention Coordinators | 12 | 12 |  |
| Total | $\mathbf{2 7 8 6}$ | $\mathbf{1 7 2 5}$ |  |

The proportions were sampled from each database using a Random Number Function in Microsoft Office Excel, 2007. This function randomly selected the sample from each group (i.e., assigned computer program-generated random numbers to each row item/name, shuffled, and sorted the spreadsheet allowing the desired sample to be drawn).

## Region VI Sample Population

Of the 14,400 Community Members sampled statewide, 1,800 individuals were selected to represent Region VI by Urban, Rural, and Frontier population densities. Southeast North Dakota Telephone Directory was the directory used for sampling and therefore represented the population within this region

## Survey Distribution

Prior to distributing the survey, a press conference was held focusing on alcohol and substance abuse in North Dakota communities in which the public was informed that a statewide AOD study would be administered in the spring. Of the first sample, 1,725 participants were selected from the key informant databases representing the professional groups previously mentioned. For the 14,400 general community members, these individuals were selected from the telephone directories to include all eight regions of North Dakota.

Surveys were mail administered and included a detailed letter discussing the nature and anonymity of the study (to include confidentiality, participation opt in/opt out, etc.), a prepaid return envelope, and an entry form for the incentive gas card drawing. This provided recipients the opportunity to become eligible for a chance to win a prepaid gas card reliant upon completion and return of the survey.

In order to minimize the number of undeliverable surveys, the envelope was addressed to the name selected in the phone directory and included or current resident. In May 2008, the surveys were mailed to the selected 16,125 and respondents were given three weeks to complete and return the survey. Data entry was completed on June 30, 2008.

## Response Rates - Statewide Participants

Of the 16,125 individuals surveyed, the overall response rate was 18.9 percent ( 3,046 of the $16,125)$. The response rate for the Community Members ( 14,400 sampled) was 16.81 percent, and for the Key Informants (1,625 sampled), the response rate was 36.29 percent.

The following is a breakdown of those Key Informant Groups with adequate rates of response: School Counselors (53.11\%); Social Services (35.35\%); Treatment Providers (41.42\%); Police Departments (43.44\%); Sheriffs (33.96\%); and Prevention Coordinators (100\%). The only Key Informant Group generating a low response rate was Family Medicine Physicians (16.81\%). In an attempt to ensure accurate response rates, respondents were given the opportunity to qualify for a prepaid gas card drawing if the survey was completed and returned. Among the surveys completed, the incentive participation rate was 15.2 percent.

## Response Rates - Statewide Non-Participants

The number of items returned totaled 79 (.48\% of the surveys mailed out). Of the Key Informants, four social workers and one family medicine physician surveys were returned stating "no longer work here." Three surveys received from one law enforcement agency were excluded, as they were photocopies of the original survey. Among the Community Members, 52 surveys were returned as "undeliverable."

Remaining surveys were returned uncompleted for the following reasons as noted:

- Deceased ( $\mathrm{n}=2$ );
- Do not participate in surveys/remove name from mailing list ( $\mathrm{n}=4$ );
- Did not feel qualified/not in touch with current issues/too old ( $\mathrm{n}=3$ );
- Completed surveys were returned past the deadline ( $\mathrm{n}=13$ ).

## Response Rates - Region VI Participants

Three hundred and twenty-two individuals from Region VI participated in the survey. Of the 1,800 Community Members sampled within this region, 274 individuals completed and returned the survey. This resulted in a response rate of 15.2 percent within this region. Among Key Informants, the total number of respondents in this group was 48 , which accounts 14.9 percent of the total $(N=322)$ within this region. The following is a breakdown of representation by profession within Region VI: School Counselors ( $\mathrm{N}=8,2.5 \%$ ); Family Medicine-Physicians (N=5, 1.6\%); Social Services (N=22, 6.8\%); Treatment Providers ( $\mathrm{N}=6,1.9 \%$ ); LEPolice ( $\mathrm{N}=5,1.6 \%$ ); LE-Sheriff ( $\mathrm{N}=1, .3 \%$ ); and Prevention Coordinators ( $\mathrm{N}=1, .3 \%$ ).

## Sample Composition by Respondent Geographic Location (Region VI, N=322)

FRONTIER ( $\mathrm{N}=125,38.8 \%$ )

- Counties: Dickey, Foster, Griggs, Lamoure, Logan, McIntosh, Wells
- Towns/Cities: Ashley*, Binford, Carrington*, Cooperstown, Dickey, Ellendale, Fessenden*, Forbes, Fredonia, Fullerton, Gackle*, Glenfield*, Hannaford, Harvey*, Heimdal, Hurdsfield, Kulm, Lamoure*, Lehr, Marion, Napoleon*, Oakes*, Sykeston, Wellsburg*, Wishek*

RURAL ( $\mathrm{N}=81,25.2 \%$ )

- Counties: Barnes, Stutsman
- Towns/Cities: Cleveland, Courtenay, Dazey, Eldridge, Fingal, Kathryn, Kensal, Leal, Litchville, Medina*, Millarton, Montpelier, Nome, Oriska*, Pillsbury, Pingree, Rogers, Sibley, Spiritwood, Streeter, Wimbledon, Ypsilanti

URBAN ( $\mathrm{N}=116,36.0 \%$ )

- Counties: Barnes, Stutsman
- Towns/Cities: Jamestown*, Valley City*

## *denotes Key Informant town/city of residence

The next section will highlight the results of the study and will include frequencies (basic percentages) according to Community Members and Key Informants, separated by Urban, Rural, and Frontier. This will include Region VI results, as well as Statewide results.

## Survey Findings

The following tables provide a descriptive summary of the findings. The percentages used to describe the findings refer specifically to overall community members and key informants. It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question.

## Section 1: Demographics

This section of the survey focused on demographic questions, including age, sex, race/ethnicity, employment status, current occupation, level of church and community volunteering, recipient location, and number of children present in the home.

Viewing the overall age distribution for Statewide respondents (47.7\%) and Region VI (43.5\%), it is apparent that nearly half of the sample fall within the 45-64 age range. Furthermore, the Region VI overall total for 65 plus category was overrepresented at 26.7 percent when compared to the U.S. Census 2006 estimates reporting that persons 65 years and over account for 14.6 percent of North Dakota's population.

According to the U.S. Census Bureau 2006 estimates, females constitute 49.8 percent of the population in North Dakota. Statewide, over sixty percent ( $61.4 \%$ Community Members and $72.8 \%$ Key Informants) of the survey population were female. Within Region VI, 62.1 percent ( $61.3 \%$ of Community Members and $66.7 \%$ of Key Informants) were female.

According to the U.S. Census Bureau 2006, North Dakota race/ethnicity estimates for white persons was 91.9 percent and for American Indian and Alaska Native persons, 5.4 percent. Given the racial and ethnic composition of North Dakota it is not surprising that 94.8 percent of the overall Statewide sample and 96.3 percent of the Region VI sample classify themselves as Caucasian.

Fifty-seven percent of the Statewide sample and 55 percent of the Region VI sample reported full-time employment, while 26.7 percent of the Statewide sample and 29.5 percent of the Region VI sample were not employed.

Table 1.5: CURRENT OCCUPATION (if not working, check category of last employment)

At the Statewide level, Professional (23.6\%), Agriculture (13.7\%), and Education (13.2\%) were among the most frequent categories of employment selected by Community Members, while Key Informants categorized their employment as Professional (57.0\%), and Education (21.9\%).
Within Region VI, Professional (20.8\%), Agriculture (16.1\%), and Education (13.5\%) were among the most frequent categories of employment selected by Community Members, while Key Informants categorized their employment as Professional (54.2\%), Government (25\%), and Education (16.7\%).

Volunteering is often considered to be a primary activity for promoting both social and personal change. Overall, 48.8 percent of Statewide and 49.1 percent Region VI respondents reported engaging in some type of church-related volunteer activity. When asked to specify the type of church-related volunteering, responses ranged from providing guidance to youth, teaching bible studies/Sunday school, and fundraising through membership in women's groups.

Regarding civic-related volunteering activity, 63 percent of Statewide respondents and 60.2 percent of Region VI respondents indicated they do not volunteer as often for civic-related community activities. Of the forty percent that indicated they do volunteer for civic-related community activities, respondents indicated that most voluntary service took place in social, political, and cultural contexts.

Considering both the Statewide and Region VI respondents, roughly sixty percent of the Community Members and the Key Informants reported having no children (including children NOT living at home) while one-quarter ( $28.4 \%$ Statewide and $25.2 \%$ Region VI) indicated 1-2 children. This would be expected given that a considerable number of respondents fell within the 45 and above age groups.

## Section 2: Community Perception of Alcohol \& Other Drug (AOD) Problem

Items in this category focused on perception of alcohol and other drug use issues within each community. Participants were questioned as to how much of a problem they perceived for both adults and youth regarding the following: use of alcohol; use of tobacco; and use of marijuana to be in their community. Other items consisted of use of Inhalants, Cocaine, Methamphetamine, Over-the-Counter Drugs, Prescription Drugs, and Hallucinogens. Final items in this section included contribution of Drug and Alcohol use to crashes or injuries, and contribution of Drug and Alcohol use to crime.

NOTE: It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question.

## Table 2.1.1 Cont'd: Perception of ALCOHOL use in your community

Statewide, 63.7 percent of respondents indicated that adult use of alcohol is a minor to moderate problem in their community, while 26.5 percent felt this was a serious problem. With Region VI, 68.3 percent of respondents indicated this to be a minor to moderate problem in their community, 20.8 percent perceived adult use of alcohol as a serious problem in the community.

At the Statewide and regional level, $87.5 \%$ of respondents overall perceived youth use of alcohol as problematic to some degree. That is, according to Statewide perception, respondents considered youth alcohol use to be a minor-moderate problem (43.3\%) or a serious problem (45.5\%). Similarly, youth use of alcohol in Region VI was perceived as a minor-moderate problem (48.4\%) or serious problem (39.1\%) by respondents.

The Statewide perceptions for both Community Members and Key Informants are very similar regarding the nature of tobacco use by adults and youth. Overall, 65.5 percent of Statewide respondents perceived adult use of tobacco as a minor to moderate problem while 56.4 percent perceived youth use of tobacco as a minor to moderate problem.

Within Region VI, 66.1 percent of the Community Members and 72.9 percent of Key Informants designate tobacco use among adults as a minor to moderate problem. Regarding tobacco use among youth, 57.7 percent of Community Members and 64.6 percent of Key Informants suggest this to be a minor to moderate problem.

Approximately fifty-five percent of the Statewide Community Members view the use of marijuana by adults as either a minor to moderate or a serious problem ( $41.8 \%$ and $11.2 \%$ respectively). Over eighty percent ( $64.6 \%$ and $18.5 \%$ ) of the Key Informants take a similar view. Regarding youth use of marijuana, 39.6 percent of Statewide Community Members perceived this as a minor to moderate problem while 18.9 percent felt it was a serious problem. On the other hand, 53.8 percent of Statewide Key Informants perceived marijuana use by youth as a minor to moderate problem while nearly one-third (32.4\%) viewed it as more of a serious problem.

Survey participants residing in Region VI show little variation from statewide percentages. Nearly forty percent (39.8\%) of the Community Members and 58.3 percent of the Key Informants considered marijuana use by adults as a minor to moderate problem. Marijuana use by youth was designated a minor to moderate problem by 42 percent of the Community Members and 52.1 percent of the Key Informants.

It is worth noting that nearly thirty percent of Region VI respondents indicated they don't know the extent of marijuana use by adults (29.5\%) or use by youth (28.6\%).

Both Statewide and Region VI respondents appear to have less knowledge on the presence and use of inhalants in their community. With adult use, 43.8 percent of Statewide respondents and 46 percent of Region VI respondents indicated don't know when asked to indicate how problematic inhalant use by adults was in their community. Similarly when looking at youth use of inhalants, 39.6 percent of Statewide respondents and 41.9 percent of Region VI respondents indicated they don't know the extent of inhalant use among youth.

Similar to perceptions of inhalant use, both Statewide and Region VI Community Member respondents appear to be less aware of the presence and use of cocaine in their community. With adult use, 48.8 percent of Statewide Community Members and 50.4 percent of Region VI Community

Members indicated they don't know the extent of cocaine use by adults was in their community. Similarly, 49.6 percent of Statewide Community Members and 49.3 percent of Region VI Community Members indicated don't know when asked about youth use of cocaine. Notably, both Statewide and Region VI Key Informants rating of cocaine use was very different from Community Members in that between 51.3 and 56.2 percent perceived adult and youth inhalant use as a minor to moderate problem.

Regarding the use of methamphetamines by adults, 32.9 percent of Statewide Community Members reported this to be a minor to moderate problem, 24.4 percent felt this was a serious problem, and 31.1 percent indicated that they don't know the extent of the problem. According to Key

Informants, 46.5 percent believed that methamphetamine use by adults was a minor to moderate problem, and 42.8 percent indicated this to be a serious problem. Only 7.6 percent reported that they don't know the extent of the problem.

Turning to the use of methamphetamines by youth, 33percent of the Statewide Community Members believed that this was a minor to moderate problem, 22.8 percent reported this to be a serious problem, and 32.5 percent don't know the extent of the problem within their community. Of the Statewide Key Informants, 50.3 percent believed that methamphetamine use by youth was a minor to moderate problem, 28.5 percent indicated this was a serious problem, and 13.8 percent don't know the scope of the problem.

Region VI responses from Community Members indicate that 36.9 percent felt adult use of methamphetamine was a minor to moderate problem, 15.7 percent indicated this to be a serious problem, and 32.5 percent specified that they don't know the extent of the problem. The Key Informant population's perception differed from Community Members in that the majority (47.9\%) indicated this to be a minor to moderate problem, 37.5 percent perceived adult methamphetamine use as a serious problem.

Region VI responses were very similar when comparing youth to adult use of methamphetamine. Of the Community Member participants, 37.6 percent felt youth use of methamphetamine was a minor to moderate problem, 14.6 percent perceived this as a serious problem, and 33.9 specified they don't know the extent of the problem. Of the Key Informants 45.8 percent perceived methamphetamine use by youth as a minor to moderate problem, 25 percent as a serious problem and 20.8 percent indicated they don't know the extent of youth use.

When asked about the use of hallucinogens in their community, both Statewide and Region VI Community Members appeared to be the least aware of such use among both adults and youth where at just over half (range $53.6 \%$ to $54.5 \%$ ) reported they don't know the extent of the problem. On the other hand, both Statewide and Region VI Key Informants perceived the adult use of hallucinogens as a minor to moderate problem with 48.4 percent and 37.5 percent respectively. With respect to youth use, 48.6 percent of Statewide Key Informants and 37.5 percent of Region VI Key Informants gauged the problem as minor to moderate.

When respondents were asked to indicate their beliefs regarding the contribution of drugs/alcohol to injuries, 49.9 percent of the Statewide Community Members indicated that this was a minor to moderate problem, while 34.7 percent felt this was a serious problem within their community. Approximately thirty-eight percent of the Key Informants indicated this to be a minor to moderate problem, while 58.3 percent considered this to be a serious problem.

Region VI responses align with those of the statewide participants. For example, 56.6 percent of the Community Members believed that the contribution of drug/alcohol use to crashes/injuries was a minor to moderate problem and 21.2 percent indicated this was serious problem. Among Key Informants, 54.2 percent felt this was a minor to moderate problem within their community and 43.8 percent specified this was a serious problem.

In sum, 77.8 percent of Community Members and 98 percent of Key Informants in Region VI perceived the use of drugs and/or alcohol as a contributing factor to crashes or injuries to some degree.

When respondents were asked about the relationship between drug/alcohol use and crime, 43.8 percent of the Statewide Community Members indicated that this was a minor to moderate problem, while 35.7 percent felt this was a serious problem within their community. Approximately thirtytwo percent of Key Informants indicated this to be a minor to moderate problem, while the majority ( $61.7 \%$ ) considered this to be a serious problem.

In terms of Region VI Community Members, 45.3 percent believed that the contribution of drug/alcohol use to crime was a minor to moderate problem and 23.4 percent indicated this was serious problem. Among the Key Informants, 54.2 percent felt this was a serious problem within their community and 39.6 percent specified this was a minor to moderate problem.

In sum, 68.7 percent of Community Members and 93.8 percent of Key Informants in Region VI perceived drugs and or alcohol as a contributing factor to crime to some degree.

## Section 3: Permissiveness of Attitudes Toward AOD Use

This section focused on how tolerant community members may or may not be in relation to AOD issues. Items required participants to indicate the extent to which they either agreed or disagreed with the following statements: youth consuming alcohol at parties; youth drinking and driving; youth smoking cigarettes; youth alcohol and other drug experimentation; parents offering alcoholic beverages to youth in their own homes; community acceptance of underage drinking; driving while under the influence of alcohol and/or drugs; and riding in a motor vehicle with someone under the influence of alcohol and/or drugs.

NOTE: It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question. For this section, response categories were collapsed into AGREE (to include agree or strongly agree) and DISAGREE (to include disagree or strongly disagree).

Table 3.1: To what extent do you AGREE or DISAGREE with the following statements?

Table 3.1 Cont'd: To what extent do you AGREE or DISAGREE with the following statements?

The statements contained in Table 3.1 were structured in such a way that agreement would indicate a permissive attitude toward drug and alcohol related issues. The results indicate that overall, Region VI Community Members and Key Informants are not tolerant of AOD use and related activity among adults and youth. A strong majority of respondents disagreed with following statements and thus, demonstrate this generalization:

- It is okay for youth to drink at parties as long as they don't get drunk ( $95.7 \%$ disagree-strongly disagree)
- Youth should be able to drink as long as they don't drive afterwards ( $94.7 \%$ disagree-strongly disagree)
- It is okay for youth to smoke cigarettes ( $97.5 \%$ disagree-strongly disagree)
- Youth who experiment with alcohol or other drugs almost always grow out of it (93.5\% disagree-strongly disagree)
- It is okay for parents to offer their youth alcoholic beverages in their home ( $92.5 \%$ disagree-strongly disagree)
- It is okay for parents to offer alcoholic beverages in their home to youth other than their own ( $97.8 \%$ disagree-strongly disagree)
- Driving under the influence of drugs and/or alcohol is okay ( $96.6 \%$ disagree-strongly disagree)
- It is okay to ride in a motor vehicle with someone under the influence of drugs and/or drugs ( $98.1 \%$ disagree-strongly disagree)

On the other hand, when asked whether drinking among teenagers is acceptable within their community, 69.3 percent of respondents overall disagree-strongly disagree while 29.8 percent agree-strongly agree.

## Section 4: Community Support for AOD Prevention

Willingness to support AOD prevention initiatives was the focus of this section of the survey. Participants were asked to rank the items ranging from strongly disagree to strongly agree. Items included the following: a focus on law enforcement competency, support for educational and prevention programs, community commitment, advertising devices, tax issues related to alcohol and tobacco, the enforcement of drinking and driving laws, and laws prohibiting parents providing alcohol to their own children.

Additional items in this section assessed responses regarding support for the following statements: drinking age of 21 years; penalties for adults who provide alcohol to youth; compliance checks; laws prohibiting giving alcohol to your own children; and DUI checkpoints. Respondents were also questioned as to whether or not they support bans on the following: liquors advertisements on $T V$; beer and wine advertisements on $T V$; and billboard alcohol advertisements. The final series of questions asked respondents if they would be willing to attend the following events if they were alcohol-free: a party; wedding dance/reception; and sporting events.

NOTE: It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question. Within this section, response categories were collapsed into AGREE (to include agree or strongly agree) and DISAGREE (to include disagree or strongly disagree).

Table 4.1 demonstrates that both Community Members and Key Informants agree on key issues ranging from enforcing minimum drinking violations to support for prevention programs and local initiatives. However, when Region VI respondents were asked to indicate the extent to which
they either agree or disagree with increasing alcohol taxes, 36.6 percent overall disagree-strongly disagree, while 61.5 percent agree-strongly agree in support of increasing alcohol taxes; no differences were noted between Community Members and Key Informants. When asked to indicate the extent to which they either agree or disagree with increasing taxes on tobacco, 27.7 percent of Region VI Community Members disagree-strongly disagree, while 69 percent agree-strongly agree. Similarly, 35.4 percent of Key Informants disagree-strongly disagree and 62.5 percent agree-strongly agree in support of increasing tobacco taxes. Overall, Region VI Community Member and Key Informant responses to increasing alcohol and tobacco taxes were similar to those found at the Statewide level. Finally, when asked whether there should be a law prohibiting giving alcohol to your own children, 66.5 percent of Region VI respondents overall were in support of such as law while 32.6 percent were not.

Overall, both Statewide and Region VI respondents supported a "Minimum legal drinking age of 21," "Penalties for adults who provide alcohol to youth," "Compliance checks," and the use of "DUI checkpoints". However, there was somewhat of a discrepancy in terms of support for "Laws prohibiting giving alcohol to your own children". While 68.4 percent of the Statewide respondents supported this law, 30.2 percent were not in favor of this type of law. Within Region VI, 65.7 percent of Community Member respondents indicated that yes they would be in support of this type of law and 32.8 percent indicated that no, they would not. Key Informant responses displayed more support for such a law in that 75 percent responded that yes they would be in support of a law prohibiting giving alcohol to your own children and 25 percent of respondents specified that no, they would not support this notion.

The results presented in Table 4.3 are very consistent across questions. Over sixty-three percent (range 63.9\% to 66.1\%) of the Statewide respondents overall support bans on television and billboard forms of alcohol advertisements while one-third ( $32.7 \%$ to $34.6 \%$ ) would not support such bans.

Results from Region VI respondents were also very similar regarding all three questions related to alcohol advertising. Over sixty-four percent ( $64.2 \%$ to $69.3 \%$ ) of the Community Member respondents were in support of banning alcohol advertisements on either television or billboards and about one-third ( $30.3 \%$ to $35.4 \%$ ) were not in support of banning this type of advertising. Key Informants were less supportive of banning alcohol
advertisements in that between 54.2 and 60.4 percent indicated that yes they would support banning this form of advertising and 39.6 to 43.8 percent responded that no, they would not be in support of banning alcohol advertising.

The absence of alcohol at parties, wedding related activities, or sporting events would not curb attendance as indicated by an overwhelming majority of both the Statewide and Region VI respondents.

## Section 5: Access to Alcohol and Other Drugs

This series of questions focused on the availability of alcohol and other drugs by youth within the sampled communities. Respondents were asked to rank the level of difficulty in which youth can obtain alcohol under the following circumstances; liquor store accessibility, bar accessibility, at home accessibility, and alcohol provided by parents and/or other family members. Regarding the accessibility of illegal substances within the community, respondents were asked to rank how difficult it is for youth to access marijuana, inhalants, cocaine, methamphetamine, and hallucinogens.

NOTE: It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question.

Table 5.1: Please respond accordingly to the following questions regarding access in your community.

When Statewide Community Members were asked "How difficult is it for youth to get an older person to buy alcohol for them," 40.1 percent indicated it was not at all difficult, 48.7 percent believed that it is slightly/somewhat difficult, and only 7.6 percent believed this be quite/extremely difficult. Similarly, 50.6 percent of the Key Informants felt this was not at all difficult, 44.9 percent responded as slightly/somewhat difficult and only 2.9 percent believed this to be quite/extremely difficult.

Consistent with the above, 39.1 percent of Region VI Community Members believed that getting an older person to buy alcohol for youth is was not at all difficult, 47.4 percent indicated it was slightly/somewhat difficult, and only 8.8 percent believed this to be quite/extremely difficult. Among the Key Informant population, 47.9 percent of respondents indicated that it was not at all difficult for youth to get an older person to buy alcohol for them and 50 percent responded that this was only slightly/somewhat difficult.

When the Statewide Community Members were asked "How difficult is it for youth to sneak alcohol from their home or a friend's home," 51.7 percent reported that this was not at all difficult, and 39.7 percent perceived this to be slightly/somewhat difficult. Regarding the question above, 68.8 percent of the Statewide Key Informants specified that this was not at all difficult and 29.3 percent thought this was slightly/somewhat difficult.

With Region VI, when Community Members were asked the same question, 43.4 percent believed this was not at all difficult and 44.2 percent indicated this was only slightly/somewhat difficult. Of the Key Informant population, 75 percent specified that it was not at all difficult for youth to obtain alcohol in this manner, while 25 percent felt that this was only slightly/somewhat difficult.

The Statewide Community Members perceived marijuana as not at all difficult for adults/youth to obtain in their community as indicated by 33.3 percent of respondents, slightly/somewhat difficult to access by 45.3 percent, and quite/extremely difficult to access by 12 percent. Among the Key Informants, almost half (49.9\%) perceived marijuana was not at all difficult for adults/youth to access, while 43.7 percent felt accessing marijuana was slightly/somewhat difficult.

In terms of Region VI, 34.3 percent of Community Members perceived access to marijuana as not at all difficult for adults/youth to obtain, 42.7 percent felt access was slightly/somewhat difficult, and only 13.1 percent perceived this to be quite/extremely difficult. Nearly forty percent (39.6\%) of

Key Informant respondents perceived access to marijuana as not at all difficult for adults/youth to obtain while over half ( $54.2 \%$ ) perceived access to marijuana as slightly/somewhat difficult.

One quarter (24.1\%) of Statewide Community Member respondents perceived access to methamphetamine as not at all difficult to access, whereas 48.7 percent believed that access was slightly/somewhat difficult. Among the Key Informants, 30.5 percent believed that methamphetamine was not at all difficult to access, over half (58.3\%) believed that access was slightly/somewhat difficult, and 8.1 percent responded that methamphetamine was quite/extremely difficult to access.

Within Region VI, 23.4 percent of Community Member respondents perceived methamphetamine as not at all difficult to access, while 45.6 percent believed that access was slightly/somewhat difficult. The majority (56.2\%) of Key Informant respondents indicated that access to methamphetamine was slightly/somewhat difficult, whereas 29.2 percent believed that accessing methamphetamine was not at all difficult.

Respondents perceived access to cocaine and hallucinogens in a similar way (i.e., slightly/somewhat difficult to access) although one-quarter thought access would be quite/extremely difficult. Overall, inhalants were perceived as the most accessible to youth and adults with 54.4 percent of Statewide respondents and 49.7 percent of Region VI respondents indicating that such products were not at all difficult to obtain.

## Section 6: Perception of Community Commitment

Lastly, participants were asked to rank the community's overall commitment to addressing the perceived problems of youth alcohol and substance use. The questions focused on the importance of preventing alcohol and drug use among youth, concern for the availability of sufficient prevention programs, the most effective method for achieving drug free youth, through educating youth, parents, or community members, the presence of leaders within the community willing to address these issues, where to seek assistance within the community regarding these matters, the presence of a community action plan, and primary sources of information regarding crime.

NOTE: It should be kept in mind that the following tables are NOT comparative in nature. In other words, though presented side-by-side, the responses of the community members and those of the key informants are NOT being compared. The tables simply present a descriptive account about how each group responded to each question. Within this section, response categories were collapsed into AGREE (to include agree or strongly agree) and DISAGREE (to include disagree or strongly disagree).

## Table 6.1: To what extent do you AGREE or DISAGREE with the following statements?

When asked whether Statewide and Region VI respondents considered alcohol and other drug use prevention among youth as important, a strong majority ( $96.6 \%$ and $97.2 \%$ respectively) agree-strongly agree. When asked whether they are concerned about the sufficiency of their community's AOD abuse prevention programs, 79.3 percent of Statewide respondents and 77.3 percent Region VI respondents indicated that they were concerned.

Finally, nearly ninety percent (range $87.9 \%$ to $93.2 \%$ ) of the Statewide and Region VI respondents agreed that alcohol and drug free youth can best be achieved by: 1) educating youth themselves; 2) educating parents; and 3) educating the community. Region VI respondent percentages were slightly higher than Statewide in their agreement that prevention education should be aimed at youth and parents.

## Appendix B: Cover Letter

## Dear Community Member:

Congratulations! You have been selected to participate in the enclosed survey designed to gauge your community's perceptions of alcohol and other drug use. As our thank-you for completing this survey, you have the opportunity to enter your name in a drawing to win one of several pre-paid gas cards worth up to $\$ \mathbf{5 0 0}$.

The Rural Crime and Justice Center (RCJC), along with the North Dakota Department of Human Services, has designed this survey to discuss alcohol and other drug (AOD) use in your community. With your help, we can identify perceptions of the AOD problem, attitudes toward AOD use, support for AOD prevention, adolescent access to AOD, and level of commitment within your community to address these issues.

It will only take 5-10 minutes to complete this brief survey. Your responses are confidential and anonymous, and will be used to develop effective responses to AOD issues at the community level. Following completion, please return the survey in the enclosed pre-paid return envelope by June 15, 2008. Results of the survey will be available to the public this fall. If you would like to participate in the drawing for a pre-paid gas card, please refer to the enclosed postcard for more information.

Your support and participation are greatly appreciated. If you have any further questions, please feel free to contact me at 1-800-777-0750, ext. 3441.

Sincerely,

Trista Ortynsky
Project Coordinator
Rural Crime and Justice Center

## Please refer to the following information regarding your participation in this survey:

The RCJC follows the guidelines stated in the United States Code of Federal Regulations 45 CFR 46.116. Any information gathered in this survey is viewed as confidential. The RCJC will follow all necessary protocol to ensure the confidentiality and integrity of all information supplied. Each survey will remain anonymous and identifiable only to the selected researchers assigned to this project. All information obtained will be restricted in a password protected database. Hard copies are stored in a protected file in a secure location. Computer and hard copy files pertaining to this data collection device will be destroyed three years following the completion of the project. Such procedures are necessary to guarantee your anonymity and to decrease any risk to your involvement as a contributor.

This survey has been approved by the Institutional Review Board (IRB) at Minot State University. For additional information regarding IRB regulations, please contact Dr. Margi Coxwell, IRB Chair, at (701) 858-3125. Please understand that completion of this survey constitutes that you fully comprehend the information contained in this letter, you provide consent to partake in completion of this survey, you fully understand that all the information you provide in this survey will be kept confidential, and you have the choice to withdraw from participation in this survey at any time.

INTRODUCTION: North Dakota's Department of Human Services has designed a Community Readiness survey to evaluate alcohol, and other drug (AOD) use. This survey is intended to measure perceptions about AOD use as well as current prevention efforts. The results will be used to help identify how prepared communities are to take action on AOD, and utilized by prevention specialists and community members to decide the best strategies for North Dakota communities.
Keeping "your community" in mind, please indicate your choice by placing a in the appropriate box. For open-ended questions, please write your thoughts in the space provided.

## Section 1: Demographics

This information will be used for statistical purposes only. Please mark your answers in the appropriate boxes.

### 1.1 What is your age?

```
\square18-20
\square 21-24
\square 25-44
\square45-64
\square65 and Over
```

1.2 Sex:
$\square$ Male
$\square$ Female
1.3 Race (please mark all that apply):
$\square$ Caucasian
$\square$ Black or African American
$\square$ American Indian or Alaska Native
$\square$ AsianNative Hawaiian or Pacific IslanderOther (please specify): $\qquad$

### 1.4 Are you of Hispanic Origin?

$\square$ No

### 1.5 Employment Status:

$\square$ full Time
$\square$ Part Time
$\square$ Full Time with Second JobNot Employed - Looking
$\square$ Not Employed - Not looking (i.e. retired, have a disability, stay-at-home spouse/parent)

### 1.6 Current Occupation (If not currently working, check category of last employment):

## $\square$ Agriculture

$\square$ Construction/MiningManufacturing

- Transportation/Utilities
$\square$ WholesaleRetailFinance and Real EstateBusiness and Repair ServicesProfessionalGovernmentLeisure and HospitalityEducationOther $\qquad$

### 1.7 Community Volunteering:

$\square$ Church
(Please specify: $\qquad$ _)
$\square$ Civic
(Please specify: $\qquad$ _)
1.8 City of Residence: $\qquad$
1.9 County of Residence: $\qquad$
1.10 Number of Children in Your Home: $\qquad$

## Section 2: Community Perception of an Alcohol \& Other Drug (AOD) Problem

2.1 How much of a problem do you perceive the use of the following substances to be in your community?

|  | Not a Problem | Minor Problem | Moderate Problem | Serious <br> Problem | Don't Know |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Alcohol |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Tobacco |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Marijuana |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Inhalants (glue, paint, aerosols, solvents, etc.) |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Cocaine |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Methamphetamine |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Over-the-Counter Drugs (abuse of cough medicines, Dramamine, diet pills, sleeping pills, etc.) |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Prescription Drugs (abuse of) |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Hallucinogens (LSD, Shrooms, PCP, etc.) |  |  |  |  |  |
| Adults | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |

2.2 How much of a problem do you perceive the following to be in your community?

|  | Not a <br> Problem | Minor <br> Problem | Moderate <br> Problem | Serious <br> Problem | Don't <br> Know |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Contribution of drug and alcohol use to <br> crashes or injuries (such as automobile, hunting, <br> boating, snowmobiling). | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
| Contribution of drug and alcohol use to <br> crimes. | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |

## Section 3: Permissiveness of Attitudes Toward AOD Use

3.1 To what extent do you AGREE or DISAGREE with the following statements?

|  | Strongly <br> Disagree | Disagree | Agree | Strongly <br> Agree |
| :--- | :---: | :---: | :---: | :---: |
| It is okay for youth to drink at parties as long as they <br> don't get drunk. | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth should be able to drink as long as they don't <br> drive afterwards. | $\square$ | $\square$ | $\square$ | $\square$ |
| It is okay for youth to smoke cigarettes. | $\square$ | $\square$ | $\square$ | $\square$ |
| Youth who experiment with alcohol or other drugs <br> almost always grow out of it. | $\square$ | $\square$ | $\square$ | $\square$ |
| It is okay for parents to offer their youth alcoholic <br> beverages in their home. | $\square$ | $\square$ | $\square$ | $\square$ |
| It is okay for parents to offer alcoholic beverages in <br> their home to youth (other than their own children). | $\square$ | $\square$ | $\square$ | $\square$ |
| In my community, drinking among teenagers is <br> acceptable. | $\square$ | $\square$ | $\square$ | $\square$ |
| Driving under the influence of drugs and/or alcohol is <br> okay. | $\square$ | $\square$ | $\square$ | $\square$ |
| It is okay to ride in a motor vehicle with someone <br> under the influence of drugs and/or alcohol. | $\square$ | $\square$ | $\square$ | $\square$ |

## Section 4: Community Support for AOD Prevention

### 4.1 To what extent do you AGREE or DISAGREE with the following statements?

|  | Strongly <br> Disagree | Disagree | AgreeStrongly <br> Agree |
| :--- | :--- | :---: | :---: |
| Law enforcement should be spending more time enforcing <br> the minimum drinking age. | $\square$ | $\square$ | $\square$ |
| Schools need to be more active in dealing with alcohol, <br> tobacco, and other drug problems. | $\square$ | $\square$ | $\square$ |
| It is possible to reduce alcohol and drug problems through <br> prevention. | $\square$ | $\square$ | $\square$ |
| Alcohol and other drug prevention programs are a good <br> investment because they save lives and money. | $\square$ | $\square$ | $\square$ |
| The community has the responsibility to set up prevention <br> programs to help people avoid alcohol and other drug <br> problems. | $\square$ | $\square$ | $\square$ |
| Public service announcements are a good way to change <br> attitudes about alcohol, tobacco, and other drug use. | $\square$ | $\square$ | $\square$ |
| Taxes on alcohol should be increased. | $\square$ | $\square$ | $\square$ |
| Taxes on tobacco should be increased. | $\square$ | $\square$ | $\square$ |
| Drinking and driving laws are enforced in my local <br> community. | $\square$ | $\square$ | $\square$ |
| There should be a law prohibiting giving alcohol to your <br> own children. | $\square$ | $\square$ | $\square$ |

### 4.2 Please check YES or NO for the following sets of questions.

| Do you support the following? | Yes | No |
| :--- | :---: | :---: |
| Minimum legal drinking age of 21 | $\square$ | $\square$ |
| Penalties for adults who provide alcohol to youth | $\square$ | $\square$ |
| Compliance checks (used to identify alcohol establishments that sell alcohol to <br> underage youth) | $\square$ | $\square$ |
| Laws prohibiting giving alcohol to your own children | $\square$ | $\square$ |
| DUl checkpoint (used by law enforcement to deter or detect a drunk driver through <br> the use of roadblocks or sobriety checkpoints.) | $\square$ | $\square$ |

| Do you support BANS on the following? | Yes | No |
| :---: | :---: | :---: |
| Liquor advertisements on TV | $\square$ | $\square$ |
| Beer and wine advertisements on TV | $\square$ | $\square$ |
| Billboard alcohol advertisements | $\square$ | $\square$ |

Would you attend any of the following events if they were alcohol-free?

|  | Yes | No |
| :--- | :---: | :---: |
| Party | $\square$ | $\square$ |
| Wedding Dance/Reception | $\square$ | $\square$ |
| Sporting Event | $\square$ | $\square$ |

## Section 5: Access to Alcohol and Other Drugs

### 5.1 Please respond accordingly to the following questions regarding access in your community.

|  | Not at All <br> Difficult | Slightly <br> Difficult | Somewhat <br> Difficult | Quite <br> Difficult | Extremely <br> Difficult |
| :--- | :---: | :---: | :---: | :---: | :---: |
| How difficult is it for youth to buy beer, <br> wine, or hard liquor at stores themselves? | $\square$ | $\square$ | $\square$ | $\square$ | $\square$ |
