# Pre-Approved Evidence-Based Prevention Strategies

This document provides a menu of pre-approved, evidence-based prevention strategies targeting underage drinking. This menu highlights strategies linked to each of the four intervening variables addressed in the ND PFS and connects those strategies with local conditions you might have identified. A description of each strategy is provided, along with various considerations for effective strategy implementation. As part of your Strategic Planning Workbook, you will be asked to create a comprehensive action plan for each strategy using “CADCA’s Seven Strategies for Effective Community Change.” Capacity building activities should also be built around each strategy prior to implementation. If you are considering implementing a strategy which isn’t listed in this strategy menu, please complete and submit Appendix B of your Strategic Planning Workbook, “Request for Evidence-Based Strategy,” and submit to Laura Anderson at [lauranderson@nd.gov](mailto:lauranderson@nd.gov). Approval from the state must be given prior to implementation of any strategy not on this list.
