## *Community Level Instrument (CLI) Timeline*

The CLI has two federal reporting deadlines each year. To submit the highest quality data, we want the CLI updated at least quarterly, but recommend entering data as interventions are implemented. Janelle will do the first few with you using GoTo Meeting. On a graduated system, based on community experience and understanding, eventually you will be filling out the CLI by yourself. If staff turnover occurs, the training and assistance from Janelle will start over until the new person is ready to complete the CLI on their own. Below is an example schedule that may vary for your specific community.
